Innovative coding solutions for the serialisation requirements of the pharmaceutical industry

Innovative coding solutions for the serialisation requirements of the pharmaceutical industry

February 9, 2019 and the associated **serialisation requirements** are imminent.

In this the key role of high-quality and long-term readable labelling is of central importance.

At **ACHEMA, hall 3.1, stand F58**, Domino, the global specialist for product coding and brand protection, will showcase future-proof coding, marking and labelling solutions which guarantee simple, successful and **compliant marking solutions** on a multitude of substrates and packaging types.

The innovative coding and marking systems enable **meeting the validation requirements** for **GMP (good manufacturing practice)** as well as implementing global legislation standards such as the **EU regulation 2016/161 to execute the Falsified Medicines Directive 2011/62/EU**, the **EU Medical Device Regulation 2017/745**, 21 CFR Part 11, e-Pedigree, SFDA, ANVISA and the US FDA UDI. Domino also provides trusted solutions for **aggregation**, i.e. the establishment of data connection at each stage of the packaging process, is required.

With a focused approach, Domino has become the preferred **strategic provider** of marking solutions to numerous **manufacturers** and **OEMs**.

Our product portfolio comprises innovative thermal ink jet (TIJ) printers with inks especially developed for the industry, laser coders, Continuous Ink jet (CIJ) printers, Thermal Transfer Overprinters (TTO) as well as Print and Apply labelling machines (PALM).
